Allowable Subject Matter

Claims 1-8, 11 and 13-52 are allowed.

The following is an examiner's statement of reasons for allowance:

As per claims 1-8, 11 and 13-52: the claims are directed to an exemplary art of traffic load determination and regulation, based on transmit power control commands in a wireless cellular communication network. The prior art of record does not teach or fairly suggest the particular features – counting a number of increase transmit power control commands issued in a/the cell over a time period; determining and regulating a traffic condition in the cell based on the number of increase transmit power control commands relative to a total number of transmit power commands issued in the cell for that period of time, as recited in claims 1, 13, 20, 34 and 45.

Art Unit: 2683

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
